RE: Application of Total Environmental Solutions, Inc. for Rate Relief
Docket No. 2004-90-W/S,
ELS File No. 557-10022

Dear Charlie:

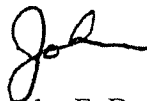

As you know, the Circuit Court has granted Total Environmental Solutions, Inc.'s ("TESI's") appeal in the above-referenced proceeding, in part, and remanded this matter to the South Carolina Public Service Commission (the "Commission") with instructions to eliminate the phased rate structure and replace it with a single rate structure for water and sewer services going forward.

On remand, in order to set the single rate structure, the Commission must eliminate phases 1 and 2. TESI believes that the sole issue before the Commission is whether the single rate structure will reflect the 20% operating margin that the Commission has found to be fair and reasonable in this docket, or whether the Commission may now find that a different operating margin is fair and reasonable. TESI hereby requests that the Commission schedule oral arguments on this issue.

Since TESI's current rates are causing it to operate at a negative (7.75%) loss, TESI requests that the Commission hear these oral arguments and set TESI's single rate structure as soon as possible

With kind regards, I am

Yours truly,

John F. Beach
